

If you use Gmail and email links on the SMGA web site don't work, here's a fix.

Open Gmail.

1. From your Gmail tab, copy and paste: **chrome://settings/handlers** to the address bar.

Turn off handlers and remove existing one

2. Click the **3 vertical dots** to the right of mail.google.com.
3. Select **Remove**.
4. Flip the **Allow sites to ask to become default handlers** switch **Off** and then back **On**.
5. Close out Gmail and then Start it again.

You should now see the Handler Icon  in the address bar.

6. Click the **handler icon**. (It's a double diamond in the right side of the URL bar.

You should get a small dialog box that asks you to **Allow mail.google.com to open all email links?**

[OBJ]

7. Choose the **Allow** radio button.
8. Click **Done**
9. Test to make sure an email link works. You can use this
link. somebody@example.com
